

IN MEMORIAM: NELSON GOODMAN

Nelson Goodman was one of the foremost philosophers of the twentieth century. Throughout his life, he championed the cause of analytic philosophy, showing how its methods could be applied to illuminate issues that are usually considered resistant, or even impervious, to analysis. He was a lifelong supporter of the vision of philosophy that *Erkenntnis* espouses, and was for many years a member of the editorial board. Accordingly, we thought it would be appropriate to dedicate a portion of this issue to his memory.
